Profile

Sukkur, Sindh

EDUCATION

2023 - PRESENT

Bachelor of Science in Computer Science (BSCS).

4th Semester

IBA UNIVERSITY

Sukkur, Pakistan

SKILLS

- Java
- C++
- OPP
- DSA
- SQL
- Database Design
- Html, CSS
- Python (learning)
- Assembly language (learning)

PROFILE

Computer Science undergraduate in 4th semester with strong foundations in Java, C++, and SQL. Experienced in developing desktop-based management systems using object-oriented programming and GUI. Actively seeking a software development internship to gain practical industry exposure.

ACADEMIC PROJECTS

Student Management System (Java, GUI, SQL)

- Designed and developed a desktop-based application to manage student academic records efficiently.
- Implemented full CRUD functionality with SQL database integration.
- Built an interactive and user-friendly graphical interface using Java GUI.

Hospital Management System (Java, GUI)

- Developed a desktop application to manage patient records and appointment scheduling.
- Applied object-oriented programming principles for modular and scalable system design.
- Implemented structured workflows to simulate real-world hospital operations.

Quiz System (C++)

- Created a console-based quiz application using C++.
- Implemented object-oriented concepts, control structures, and file handling.
- Designed scoring and result evaluation logic for user responses.

Database Management System Project (SQL)

- Designed and implemented a relational database schema using SQL.
- Created and optimized tables, relationships, and constraints for data integrity.
- Wrote complex SQL queries for data insertion, retrieval, updating, and reporting.
